

USDOT Connected Vehicle PlugFest

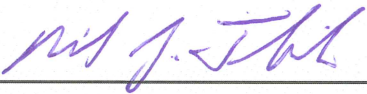

November 15 - 18, 2016

- The event is sponsored by the US Department of Transportation (USDOT) and organized by Danlaw, 7Layers and Southwest Research Institute (SwRI).
- As a member of the OmniAir Consortium which advocates and promotes connected vehicle certification, Danlaw has volunteered to provide the venue for the event to take place.
- There will be three segments of the PlugFest event:
 - 1) Industry presentation segment.
 - 2) An open-forum for participating suppliers to test the compatibility of their device with counterpart suppliers (as would be necessary for vehicle to vehicle communication in a real-world environment).
 - 3) Private testing of devices with three companies at the event designated to test operability of devices.
- The three designated test companies are Danlaw, 7Layers and SwRI.
- The test results for suppliers who choose to have their device tested privately by Danlaw, SwRI and 7Layers will be tabulated and provided to the USDOT. However, the results will be shared anonymously. A company name will not be attached to any particular set of test results.
- All participants who have a device tested in private will be provided a copy of the anonymous test results tabulated for all devices tested for comparison purposes.
- Danlaw, 7Layers and SwRI all agree to keep the private test results confidential and will not disclose the results to any other party beyond providing tabulated anonymous data to the USDOT.
- As the event host, Danlaw will provide public Wi-Fi for participants as a convenience for the participants, however, it should be viewed as any other non-secured public Wi-Fi network and users must consider and are solely responsible for assuming the inherent risks of data security.
- Participants must be authorized by their company to participate in the PlugFest.
- Cameras are not allowed at the event including the requirement that cell phone cameras not be used to take photographs.

Confidential Information. Danlaw, 7Layers, Southwest Research Institute (SwRI) and OmniAir agree to not directly or indirectly disclose to any other person, firm, or corporation, any information or documents or make available to others any information, documents, files, or other papers received as a result of any of the private testing conducted at PlugFest. The test results will become part of the tabulated anonymous test results to be shared with the USDOT and other PlugFest private testing participants. Test participants understand and agree to this use of the test information from their device.

Disclaimer. Danlaw, 7Layers, Southwest Research Institute and OmniAir are not responsible for any information shared in the open forum portion of the event. PlugFest participants represent that they have the authority to disclose to the "Receiving Party" any "Confidential Information" they elect to disclose at the event.
